OK, the rest appears to be format issue.

I do not have MS Word to test, so I would like to ask for more data:

```
bool PasteClip::Accept(const char *_fmt)
{
    Vector<String> f = Split(_fmt, ';');
    for(int i = 0; i < f.GetCount(); i++) {
        if(IsAccepted() && fmt == f[i])
            return paste;
        if(IsAvailable(f[i])) {
            accepted = true;
            if(paste) {
                fmt = f[i];
                DDUMP(fmt); // NEW
                data = Get(f[i]);
                SaveFile(GetHomeDirFile("data.bin"), data); // NEW, Set appropriate path here....
                return true;
            }
            break;
        }
    }
    return false;
}
```

then D&D JPG from MSWORD->UWORD, post format here and zipped data.bin...

Mirek
