AttrText is now full 'rich Value', in order to simplify issues demonstrated e.g. here:

[http://www.ultimatepp.org/forums/index.php?t=msg&th=9189 &start=0&](http://www.ultimatepp.org/forums/index.php?t=msg&th=9189&start=0&)

Instead of single WString text, it now contains Value and String - setting Value to AttrText sets both, but it is later possible to specify different text to be displayed - and Value is then used for sorting.
