Hello Edward,

For me it clearly compile. I use Kubuntu 14.04 with GCC.

Quote:

C:\upp\uppsrc\firstGUI\main.cpp: In function 'void GuiMainFn\_()':

C:\upp\uppsrc\firstGUI\main.cpp:10:16: error: 'class firstGUI' has no member named 'Run'  
firstGUI().Run());

I do not see "firstGUI" class in your project? Did you put "using namespace Upp;" in your .cpp file?

In main function you have something like that:

```
GUI_APP_MAIN
{
    SimpleDemo().Run();
}
```

P.S.

I have uploaded fixed package.

Sincerely,  
Klugier
