Hello Edward,

For me it clearly compile. I use Kubuntu 14.04 with GCC.

Quote:
C:\upp\uppsrc\firstGUI\main.cpp: In function 'void GuiMainFn_()':
C:\upp\uppsrc\firstGUI\main.cpp:10:16: error: 'class firstGUI' has no member named 'Run'
firstGUI().Run();

I do not see "firstGUI" class in your project? Did you put "using namespace Upp;" in your .cpp file?

In main function you have something like that:

GUI_APP_MAIN
{
 SimpleDemo().Run();
}

P.S.
I have uploaded fixed package.

Sincerely,
Klugier
