Hi,

How Can I use spinlock?

```
bool m::add()  
{
```

```
    int free_index;  
    {  
        SpinLock _;  
  
        }
```

Is this correct? Should spinlock be static SpinLock _;?

or

```
static SpinLock _;  
  
{  
    SpinLock::Lock l(_);  
}
```

A.
