bonami wrote on Fri, 13 March 2015 09:59i built an app with theide on Ubuntu 14 and copy it to Ubuntu 12.
Then it complains
/usr/lib/x86_64-linux-gnu/libstdc++.so.6: version `GLIBCXX_3.4.20' not found
How to compile a bin to be used on other versions of Linux?

Short answer: You cannot. Welcome to linux... :)
