Hello Daniel

After hacking a little bit in GridCtrl I have commented out this in Hidden() function:

```
GridCtrl::ItemRect& GridCtrl::ItemRect::Hidden(bool b)
{
    hidden = b;
    // if(hidden)
    // size = 0;
    return *this;
}
```

In addition, after calling Hidden() I call Show(false) to the EditFields assigned to Hidden columns

With these changes the results are like this

It is not perfect but at least it is functional by now.
