Subject: Re: How to hide/show gridctrl column at runtime
Posted by koldo on Wed, 18 Mar 2015 11:18:34 GMT

Thank you Daniel

I did not know Repaint() function. It does not work with GetColumn() but it does with ShowColumn()/HideColumn(), although when the columns are hidden, a blank area appears as in the image inclosed before.

Important: The grid is defined Editing().ResizeColMode(0).
