Subject: IDE not retaining SDK path
Posted by eldiener on Thu, 19 Mar 2015 17:11:49 GMT

Using the latest version of U++ (8227) and choosing the menu Setup | Automatic setup... I enter the path to the SDK version 7.1a on my machine for VC++ 12.0. I then click the OK button. But when I next open the same dialog the path I entered is gone.

I cannot use VC++ 12.0 if the SDK paths are not there when I try to build.
