Hi,

When I execute consecutive requests (e.g. multipart/post/multipart) they contain parts of previous requests.

Of course I can call Clear() between requests, but it closes connection as well.

Test code:

```
#include <Core/Core.h>
```

```
using namespace Upp;
```

```
CONSOLE_APP_MAIN
```

```
{  
  StdLogSetup(LOG_FILE | LOG_CERR | LOG_TIMESTAMP);
```

```
  HttpRequest hr("http://posttestserver.com/post.php");  
  hr.Trace();  
  hr.KeepAlive();
```

```
  hr.New();  
  hr.Part("field1", "Lorem ipsum dolor sit amet, consectetur adipiscing elit");  
  hr.Part("field2", "sed do eiusmod tempor incididunt ut labore et dolore magna aliqua");  
  RLOG(hr.Execute());
```

```
  hr.New();  
  hr.Post("field1", "Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut  
aliquip ex ea commodo consequat");  
  RLOG(hr.Execute());
```

```
  hr.New();  
  hr.Part("field1", "Lorem ipsum dolor sit amet, consectetur adipiscing elit");  
  hr.Part("field2", "sed do eiusmod tempor incididunt ut labore et dolore magna aliqua");  
  RLOG(hr.Execute());  
}
```
