Hi,

When I execute consecutive requests (e.g. multipart/post/multipart) they contain parts of previous requests.

Of course I can call Clear() between requests, but it closes connection as well.

Test code:

```
#include <Core/Core.h>

using namespace Upp;

CONSOLE_APP_MAIN
{
    StdLogSetup(LOG_FILE | LOG_CERR | LOG_TIMESTAMP);

    HttpRequest hr("http://posttestserver.com/post.php");
    hr.Trace();
    hr.KeepAlive();

    hr.New();
    hr.Part("field1", "Lorem ipsum dolor sit amet, consectetur adipiscing elit");
    hr.Part("field2", "sed do eiusmod tempor incididunt ut labore et dolore magna aliqua");
    RLOG(hr.Execute());

    hr.New();
    hr.Post("field1", "Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat");
    RLOG(hr.Execute());

    hr.New();
    hr.Part("field1", "Lorem ipsum dolor sit amet, consectetur adipiscing elit");
    hr.Part("field2", "sed do eiusmod tempor incididunt ut labore et dolore magna aliqua");
    RLOG(hr.Execute());
}
```
