Subject: Re: how to compile source files and create shared lib.
Posted by mtdew3q on Mon, 04 May 2015 03:25:25 GMT

I am glad I can use synaptic and read it. Umk was going to try to wipe out theIDE. I can't find out how to build a shared library file in U++. I will search a little more but not too much longer. I hoped to do everything from within the IDE. Not sure if it can be done "by me".

thanks
