Modry_Oblak wrote on Fri, 19 June 2015 12:15I am new to Ultimate++ and new to programing in c++.
I use MS VS 2013 Community edition and U++ instalation from upp-win32-8227.

After complete instalation guide i copy code,

```
// -- example --
   #include <iostream>

   int main(){

      char dummy;
      std::cerr << "Hello, platform! " << std::endl;
      std::cin >> dummy;
   }
// -- example --
```

 but it throw me errors:
1. LINK warrning LNK4224 /INCREMENTAL:YES is no long supported; ignored
2. LINK: fatal error LNK1104: cannot open file 'uuid.lib'

Another and main problem is, i can not execute any example in U++. If i execute example i get error:

Filte: Core/Core.h | Line: 157 | Message: fatal error C1083: Cannot open include file: 'windef.h': No such file or directory

It looks like Windows SDK is not installed or configured proprely... Have you installed it? (Visual Studio Community Edition does not install that AFAIK)
