Hi,

I'm trying to add https requests in a project, and the compiler complains for files not found in uppsrc/Core/SSL/SSL.h. I see in this file :

#include <openssl/ssl.h>
#include <openssl/conf.h>
#include <openssl/err.h>
#include <openssl/engine.h>

But I have not openssl folder ! WTF ?

I'm using version 8394 under Linux Mint 13. /usr/share/upp/uppsrc/Core/SSL/SSL.h is dated August 31, 2012. Is it Ok ?

All others things I use work correctly...

Thanks.
