Didier wrote on Mon, 29 June 2015 19:29Hi I just saw the logo in my daily version and it seemed awkward.

Old logo is looks better for me

Well, this might be my fault, I might have rushed a bit integrating it with "TheIDE" text and placing it with the white space.

Maybe the author could provide complete about/splashscreen, with TheIDE text integrated? Just keep in mind that we are going to have there some additional info (ide version, 64 bit flag, GTK flag, memory consumed a the new is number of classes and code items in database).
