Subject: How does one set the output for library files?

---

I want a simple directory setup.

bin\ ; for 32 bit binaries

bin64\ ; for 64 binaries

lib\ ; for 32 bit libraries.

lib64\ ; for 64 bit libraries.

And not a ridiculously long path.

For binaries is relative easy. But how do I tell U++ to put the libraries where I want them to be?
