Hi Honza,

Sorry, I have still problem... I quickly tried to install on Fedora 21, not so much time to investigate -> I just hope that I did not miss something easy to find...

First, yum cannot find anymore upp-devel-8355-6.1.noarch.rpm. I don't know why (I do have home:dolik_rce:nightly.repo in /etc/yum.repos.d) and to try I just downloaded all rpms and did a yum localinstall.

Doing that, I have still upp-devel-8355-6.1.noarch.rpm complaining for missing dependency libexpat-devel...
