cbpporter wrote on Thu, 30 July 2015 14:22Well I manged to fully mess up my VS and SDKs and nothing is working any more. Not even VS can find the SDK. I need to fully clean my system.

Hopefully a Windows reinstall won't be needed :).
Nope, needed to reinstall Windows.

Even after cleanup, VS refused to install correctly so I had to wipe the OS.

It is a really bad idea to install every VS.

Next time I'm doing it in a VM.
