Novo wrote on Thu, 06 August 2015 05:30: Is it possible to add an UPP_SVN_VERSION (version of UPP that was used to build a package) to a list of defines?

TIA

Maybe. Not well defined though...

One possible algorithm is to scan through nests for one ending with 'uppsrc' and get svn version of that. Disadvantage there is that it would work only if uppsrc is svn checkout...
