Hi,

When I create New Windows application the default layout size is 200x100 pixels.

But when checked actual size it is 240x130 pixels. Running exe window size is same with additional borders and title.

My display resolution is 1366x768. Using win 10 and latest SVN sources 8845. IDE compiled with this source.

Layout window in IDE also draws this rectangle as 240x130 pixels.

```
LAYOUT(testsizeLayout, 200, 100)
END_LAYOUT
```

What can be problem?
