Draft one:

<http://ezellmedia.com/upp/IntroU++/IntroU++.html>

Thoughts, corrections, suggestions?

I didn't want to enumerate a huge feature list like the other one, because frankly, I don't think most people care. They just want to know does it work, and how easy is it. If we can "hook" them, they will come to the site for specific details. But this is up for debate too.

I'll submit it maybe tomorrow, depending on what feedback I get from you all.
