- mingw-w64 should come with it (to create better out-of-box experience)
Will you add MinGW to nightly builds too? Probably MinGW will significantly increase installer size. Right now it is great that U++ is so small and there is no need to wait for hours donloading it on slow connections.

Yes. I think mingw will add about 30MB to the download. I do not think it is a problem. But I can be persuaded to have "mingw-free" version...

30 Mb is not a problem.

Thank you for U++!!!
