Hey All,

```
SqlVal ro;
Sql UserQuerySql;
UserQuerySql.Clear();
UserQuerySql * Select (Count(MBVARINDEX)).From ( PARAMETER );
while ( UserQuerySql.Fetch() )
{
    ro=Count(MBVARINDEX);
}
```

In the above query whatever the count value I am getting is of type 'SqlVal', I want that to typecast into 'Int', Let me know how to do typecasting for it.

Thanks & Regards,
