rbmatt wrote on Sun, 13 August 2006 09:13luzr wrote on Sun, 13 August 2006 04:26- remove "NTL" notes. It is not very important at that point and it even is not true (Core was always Core, just in short period, before releasing U++ as public project, as first try, I extracted container classes from the Core, named them "NTL" and released).

I actually pulled that section from Wikipedia... does that mean that article is wrong?

Yes. Going to fix that.

Mirek
