sergeynikitin wrote on Sat, 31 October 2015 15:06Try DeQtff() function before call.  
for ex.:  
instead

put

Well, that was not a cause here. However, speaking of DeQtff, in most cases you can use "\\1"  
escape instead.

Exclamation("\\1" + filename + "\\1");

(In most case -> as long as you can be reasonably sure there is no \\1 in the string... :)
