Subject: Re: Raspberry Pi 2: readme file
Posted by forlano on Wed, 11 Nov 2015 21:01:38 GMT

Some news about my last Raspberry Pi 2 experiment.

I followed the readme instruction of upp-x11-src-9168.tar.gz.
The libGTK2dev was not automatically downloaded. I had to download myself.
Theide was compiled without problem and even the installation was OK.
I tried to compile the HelloWorld oackege with
GUI NOGTK
flag. It compiled without problem but the window didn't open.
Then I compiled the package with flag
 GUI
and it was executed as expected.

It seems that GTK is very important to let the program to run correctly.
Anyway, even if the compilation is really slow, I have a wonderful GUI to use for my next
experiments!.
