Interesting,

i think that can be acheived by adding a macro ALL_TABLES_NAME :

```
#define MODEL <studyDraw_01/db.sch>
#define SCHEMADIALECT <plugin/sqlite3/Sqlite3Schema.h>
#include "Sql/sch_header.h"
#include "Sql/sch_source.h"
#include "Sql/sch_schema.h"
```

```
#define MODEL <studyDraw_01/db_info.sch>
#define SCHEMADIALECT <plugin/sqlite3/Sqlite3Schema.h>
#include "Sql/sch_header.h"
#include "Sql/sch_source.h"
#define ALL_TABLES_NAME AllTables2
#include "Sql/sch_schema.h"
```

then in the file "Sql/sch_schema.h" :

- use ALL_TABLES_NAME instead of AllTables
- add this macro befor :

```
#ifndef ALL_TABLES_NAME
#define ALL_TABLES_NAME AllTables
#endif
```

- add this one at the end of file

```
#undef ALL_TABLES_NAME
```
