Yes, it worked! For all the semi-professionals here :) : What does this parameter?

Well, U++ is little by special as by design, placing as much as possible on stack, it uses a lot of stack. sizeof(RichEdit) is about 75KB

Now default stack size for VC++ compiler is only 1MB. If you invoke dialog from some complex main windows, you can run out of stack quite easily.

The option increases the stack size to 20MB...

Mirek
