Subject: msC15 vs msC15x64
Posted by forlano on Thu, 31 Dec 2015 13:45:44 GMT

Hello,

I have installed latest upp nightly build with MSVC2015 on my notebook 64bit.
In menu item "Setup/build method" I can choose between MSC15 and MSC15x64 method.
Does it mean I can compile a program in 32 or 64 bit mode using one of these two methods?

At moment to compile in 32 bit mode I switch computer.

Thanks and Happy New Year!

Luigi
