Subject: TopWindow Partial Invisibility Option? Posted by Werner on Tue, 15 Aug 2006 20:46:39 GMT View Forum Message <> Reply to Message

I would appreciate to carry on with the idea of a trimmed TopWindow in the thread "No title bar and no frame, just Image or Ctrl":

Is it possible to create a TopWindow which

1. normally has no frame

2. has a transparent view

3. but shows a widget in this transparent view

4.

and optionally looks like a standard TopWindow?

In other words:

Can I create a TopWindow which shows but - e. g. - a filled ellipse and "pops up" the rest of itself when the ellipse is right-clicked?

Werner
