Hi,

You can simply construct Pointf from two doubles: Pointf(x, y). So the code would be:

```
Vector<Pointf> data;
while (!inF.IsEof()) {
    SplitTo(In, ',', val1, val2);
    double x = StrDbl(TrimBoth(val1));
    double y = StrDbl(TrimBoth(val2));
    data.Add(Pointf(x,y));
    In = inF.GetLine();
}
```
