Hello Honza,

Well I will think about your proposition, but please notice that you don't need to remember that, because you can generate package with above main via TheIDE template in "New package" creator. I added bazaar/upt/GoogleTest.upt file. In the future I plan to remove int main and replace with `CONSOLE_APP_MAIN` for more upp style. In addition `CONSOLE_APP_MAIN` allows checking memory leaks.

Sincerely,
Klugier
