Starting from upp-x11-src-9424.tar.gz, I get the following error when compiling TheIDE:

```
Core/Mt.cpp: In function 'void Upp::ReadMemoryBarrier()':
Core/Mt.cpp:372:6: error: redefinition of 'void Upp::ReadMemoryBarrier()'
 void ReadMemoryBarrier()
      ^
In file included from Core/Core.h:251:0,
                 from Core/Mt.cpp:1:
Core/Mt.h:152:13: error: 'void Upp::ReadMemoryBarrier()' previously defined here

 inline void ReadMemoryBarrier()
             ^
Core/Mt.cpp: In function 'void Upp::WriteMemoryBarrier()':
Core/Mt.cpp:394:6: error: redefinition of 'void Upp::WriteMemoryBarrier()'
 void WriteMemoryBarrier() {
      ^
In file included from Core/Core.h:251:0,
                 from Core/Mt.cpp:1:
Core/Mt.h:157:13: error: 'void Upp::WriteMemoryBarrier()' previously defined here

 inline void WriteMemoryBarrier()
             ^
```

upp-x11-src-9418.tar.gz compiles OK.

Linux Mint 17.3 Cinnamon 32-bit
