luzr wrote on Wed, 16 August 2006 07:41You most likely do not have latest sources from uvs2. Compressed topics are not yet in dev version.

To compile eyecare, you do not need new ide, but sources (you need the ide to edit that topic++).

Actually, good to know that - I am afraid you we should rather use 605 than latest dev version for article. Simply remove that topic and redo it - should work OK.

Mirek

Compiling was not a problem for me. (in c++, I can use comments)
But I wanted to see that compressed topic...
