Tom1 wrote on Mon, 01 February 2016 13:05Hi Mirek,

Is this the death of Bazaar::Protect package, which only works on MSC9, or is there a workaround?

Best regards,

Tom

I keep this in mind, but I have no time and energy to fix it :( I have to apologize, but I do not want to hold changes just because Protect...

Why do not you try? It should be quite simple, all you need is to find or implement "length of x86 instruction" algorithm and then replace increments by 1 in 'code scrambler' by increments by length...

Mirek
