Subject: Re: Wrong application path when switching assemblies but same project
Posted by Klugier on Sun, 21 Feb 2016 12:45:36 GMT

Hello,

Maybe you should change bazzar "/home/ruben/upp/b azaar" to "/home/ruben/upp/bazaar? Please tell me dose it change anything?

You can also try to change output directory for second assembly form "Output directory: /home/ruben/.upp2/_out" to "Output directory: /home/ruben/.upp1/_out" (The same output directory as first assembly).

* I have never changed output directory for my newly assembly, so maybe it can causing problems. Please test with the same output directories.

Sincerely,
Klugier
