Subject: Re: A small issue with CodeEditor Posted by Klugier on Fri, 26 Feb 2016 20:49:58 GMT View Forum Message <> Reply to Message

Hello cppborder,

I think we also put breakpoint in the wrong place. Please notice that it overlaps age information. In addition client programmer should have ability to turn off annotations and breakpoints.

For the firs issue I posted diff that adds age\_width parameter to EditorBar and use it in draw method and size synchronization.

EDIT: DIFF deleted due to destroying annotations.

Sincerely, Klugier
