The following link is not exactly what I was looking for - it's C# ...

Anyway I could imagine that it might prove quite useful :

<http://www.codeproject.com/cs/miscctrl/MonthCalendar.asp>

As soon as I find something in C or C++ I'll let you know.

Thanks! Unfortunately this calendar calculates week number using ISO8601 method which is already implemented in datetimestruct...

PS: Do we really need another method of week calculation??
