Hello,

You can also check that you have selected good options when installing visual studio -
[http://www.ultimatepp.org/app\\$ide\\$install\\$en-us.html](http://www.ultimatepp.org/appideinstall$en-us.html).

Make sure you have selected "Universal Windows App Development Tools". Two months ago I was installing Visual Studio and I didn't checked this options and nothing was working :)

EDIT: I updated the doc site and required options are now explicitly written on page.

Sincerely,
Klugier
