I inspected some example in reference,

you can probably fix you problem simply by changing

Customers.AddColumn(PROSPECT, "Prosp.", 5).Edit(OpProspect);

to

 a.AddColumn(PROSPECT, "Prosp.", 5).Ctrls<Option>();

Turns out Mirek has taken care of your situation long long time ago. But again, use customized Display to draw a picture requires more coding, but will save you some memory. Whether it's worth it is your own decision.
