error: could not convert 'daa' from 'Upp::String' to 'std::__cxx11::string {aka
std::__cxx11::basic_string<char>}'

This error when trying to compile with MINGW

I can compile this app with MSC15 without this link error.

apparently this is with c++ 11 but what is the difference between MINGW and MSC15 compiler?

this is with up9701 U++ for Windows with MinGW-w64 toolchain
