project rename project error: Renaming package folder has failed.

<http://www.ultimatepp.org/forums/index.php?t=msg&th=9642> &start=0&

If a function is in the ide and it does not work it seems like a BUG

Hopefully it can be fixed rather than removing it.

Lance was good to post a possible solution but I can see a lot of hours being spent before actually getting a project renamed or just giving up.

Thanks
Neil
