dolik.rce wrote on Fri, 06 May 2016 22:53Hi Mirek,

I have updated the packaging to use C++11, but TheIDE build still fail. The error says DeepClone is not declared, you can see it in the build logs, e.g. for Debian Wheezy. Could you have a look at it, please?

Honza

Most likely it is missing MT in main package config.
