---

My project worked long ago.

Then I updated U++ to 9818 on windows. When I built my project again with MinGW, it complained many errors. So I updated MinGW, including libc, etc.

It still complained C++11 not supported, so I had to add a `-std=c++11` option.

But it still complained `_hypot`, `PCONDITION_VARIABLE`, `CONDITION_VARIABLE` and `stricmp` not declared.
