Subject: seems incompatible with mingw Posted by bonami on Thu, 12 May 2016 07:37:00 GMT

My project worked long ago.

Then I updated U++ to 9818 on windows. When I built my project again with MinGW, it complained many errors. So I updated MinGW, including libc, etc. It still complained C++11 not supported, so I had to add a -std=c++11 option.

But it still complained \_hypot, PCONDITION\_VARIABLE, CONDITION\_VARIABLE and stricmp not declared.
