koldo wrote on Tue, 17 May 2016 09:11Quote:I don't know where it should go, in "instant" or "legacy" setup, but I clicked instant and it took foreverYes, I would call it "Automatic" instead of "Instant".

Yesterday I installed a new MSC15 and finally I set the directories by hand, that was easy but not evident as thanks to Microsoft, in different computers the MSC15 directories are different

ok, looks like they have updated some things...

Currently, U++ is trying to search for dirs based on names. I guess they have changed.

Could you give me overview of dirs in Program Files? Like

```
cd /Program Files
dir /AD /S
```
