mdelfede wrote on Sat, 21 May 2016 01:20I've to upgrade the ubuntu version of my remote server to 16.04 too... and I'm quite scared about it.
From 12 to 14 the server was blocked not rebooting for one day, and now I've got much more people using it.
And my server is some 1200 KM away too....

I guess the same place as ultimatepp.org, right? :)

Anyway, next time, I would probably do clean setup...
