mirek wrote on Sat, 21 May 2016 06:09As .exe size reduction by using Optimal mode became irrelevant over years, I have removed Optimal mode (and Size / Speed) from the ide.

It is now either Debug or Release and options for release are by default set to speed optimization.

Debug or Release seems like a good change.

When will the nightly builds include this change?

edit: upp 9861 has the change
