- First computer

vc = c:/program files (x86)/microsoft visual studio 14.0/vc bin = c:/program files (x86)/windows kits/10/bin/x86 inc = c:/program files (x86)/windows kits/10/lib/10.0.10240.0 lib = c:/program files (x86)/windows kits/10/lib/10.0.10240.0

vc = c:/program files (x86)/microsoft visual studio 14.0/vc bin = c:/program files (x86)/windows kits/10/bin/x64 inc = c:/program files (x86)/windows kits/10/include/10.0.10240.0 lib = c:/program files (x86)/windows kits/10/lib/10.0.10240.0

- Second computer

vc = c:/program files (x86)/microsoft visual studio 14.0/vc bin = c:/program files (x86)/windows kits/8.1/bin/x86 inc = lib =

vc = c:/program files (x86)/microsoft visual studio 14.0/vc bin = c:/program files (x86)/windows kits/8.1/bin/x64

inc = lib =

I am a little bit confused by "first" and "second" computer now... It looks like on "first" computer, Instant setup worked OK?
