That looks like Visual Studio 2015/MSVC14. MS in their infinite wisdom went with:

Visual Studio 2015 => MSVC14
Visual Studio "15" => MSVC15

So it is mislabeled by TheIDE. I don't think that is important though. Still, I can't help you more because I'm having problems compiling too.

But one thing you can do is go over all those paths in TheIDE and click on each to open the path selector. Some of the paths on my setup look good, but TheIDE complains that it can't open them.
